Abstract (en)
[origin: WO8203206A1] Device for opening mail envelopes (13), in which a movable blade (10) is mounted on a support (3) and moves against a fixed edge which can be a blade (25). The movable blade extends diagonally in a longitudinal direction. The cutting is carried out in the place where the blades (10, 25) are engaged, by means of a progressive displacement of the movable blade along the edge of the envelope. The blades (10, 25) are mounted on a frame (1). A waste container (32), rearwardly removable, can be placed under the blades.
