Abstract (en)

[origin: WO8203163A1] The patent for the invention "thermo-regulated circulating air ambient for beds", includes the connection to a single or double bed, of a removable cover (6), that contains the air which is warmer or cooler than the temperature of the rest of the room, with frequent regulation by one or more thermostats of the temperature wanted, furnished by a mini airconditioning apparatus (C). There is also another model (7) that permits the user to keep his head uncovered. It can also be connected to small beds or cradles.
