Abstract (en)

Thatch (2) made of artificial, preferably fire proof or fire resistant raw material (e.g. polyprop), the thatch (2) having an uneven surface structure, the processing of which may be effectuated in the same way as natural thatch is processed. In another processing method pre-fab base-sheets (1) may be produced, covered with artificial thatch (2), suspension hooks (3) on the back side of the sheets allowing the affixation of the sheets directly on the rafters (4). For certain purposes the artificial thatch tubes may be provided with a profile over their lengths.
