Abstract (en)

[origin: EP0074638A2] 1. Ornamental device with a sheet-like holder (1) having openings (2) and containers (3) which pass through respective ones of these openings (2), being held in the opening (2) in the holder (1) by at least one part (5) projecting beyond the outer wall (4) of each container (3), in such a way that the projecting part (5) rests on the edge of the opening (2) in the holder (1) and which contain in particular flowers, plants, bulbs and/or tubers, characterised in that each container (3) has at least one cylindrical outer wall (4), that the projecting part (5) is arranged at an axial height spaced away from the ends of the container (3) and by four collar formations (5) projecting outwards beyond the outer wall (4) of each container (3), being spaced apart from one another and uniformly distributed around the periphery, and that the opening (2) in the holder (1) is of rectangular shape, permitting the collar formations (5) to pass through it.
