Abstract (en)

[origin: EP0075263A1] 1. Suppressor screen for ignition distributors in internal combustion engines, consisting of a sleeve made of elastic and slightly flexible material which is electrically conductive or has electrical wires embedded therein, which surrounds the distributor and its leads in the output region, characterised by the fact that the sleeve (1, 10, 20, 30) is constructed as a foldable moulded component which during assembly can be applied to the distributor (2, 17) in the open unfolded state, and whose side edge surfaces can be connected to each other releasably (7) in such a way that they lie adjacent to each other when assembled.
