Abstract (en)

[origin: EP0075526A2] For the permanent deformation of two claws threaded into one another, stamps are pressed into the lock on both sides and crush it from both sides. The pressure and the counter-pressure are preferably applied by two stamps in each case which are arranged opposite each other. The stamps which apply the counter-pressure are attached to a table so as to be easily displaceable. Blunt and sharp stamps can be used simultaneously. <IMAGE>
