Abstract (en)

1. A foldable panel adapted for forming a movable folding partition made out of a sheet material forming interconnected pockets (50) and including insulating material bands (5), wherein said sheet material is at least partially transparent and at least at some transparent portions thereof, said insulating material bands (5) are pierced with holes (4) to permit looking out through the panel.

Abstract (fr)

Le panneau est constitué par l'assemblage de deux toiles au moins partiellement transparentes (1) au moyen de couples de soudures (2) définissant entre elles des poches (50) pour des bandes de matériau isolant (5) comportant des trous traversants, en formant également des fourreaux (3) pour des tubes-charnières (7) du panneau, lequel présente ainsi de bonnes qualités d'isolation tout en permettant de voir au travers.
