Abstract (en)

A weaving method for producing tubular jacquard fabric, by means of looms, in which wording and/or patterns appear, in positive, on the outer faces of both sides of the tubular fabric. According to the invention, the warp threads (1,3,5,7,9) having odd positional orders and the warp threads (2,4,6,8,10) having even positional orders are interwoven with the weft threads (13,14) of a first and a second order of insertion respectively, inserted alternately to each other, making the respective weft threads appear on the outer faces of the two sides of the tubular fabric, in positions defining wording and/or patterns according to a pre-established jacquard weaving programme.
