Abstract (en)  
[origin: US4572152A] An air-gun in which the main cylinder and piston assembly providing the compression of the air for the projection of the shot is associated with another compensating assembly of cylinder and piston, this compensating assembly of piston and cylinder being located in the body of the main piston itself or in a chamber communicating with the main cylinder and comprising a piston free to move within the corresponding cylinder which latter is in communication at one end with the main cylinder and is closed at the other end.
