Abstract (en)

[origin: EP0077070A1] 1. Method of setting base elements (11), levelled in respect of height, of a double floor by adhesive bonding to the underfloor (10) and subsequent levelling of the upper sides of the base elements (11), characterised in that ready-made billets (24) of a dimensionally stable material that is capable of being separated are bonded in an upright position to the underfloor (10) and then cut to length at the desired height.
