Abstract (en)

[origin: US4445419A] An ammunition container, especially a drum magazine, is subdivided by side walls into a plurality of sector-shaped compartments. Within the ammunition container there is located a cartridge belt, and protruding into each compartment is a loop of such cartridge belt. Each loop of the cartridge belt consists of two loop portions which bear against the side walls of the drum magazine. By means of magnets, located between the side walls of the drum magazine and the loop portions of the cartridge belt, the cartridges are secured against unintentional shifting.
