Abstract (en)
[origin: EP0077165A1] A motor-driven wheel (10) for sanding irregular surfaces including a plurality of flexible support members (16) projecting generally radially outwardly from a hub assembly (12) and a plurality of separate nonconnected lengths (18) of flexible abrasive-coated material projecting along the support members from within the hub assembly (12). Each of the lengths (18) of abrasive-coated material is releasably secured in the hub assembly by separate means positioned adjacent the periphery of the hub assembly (12) which permit, when released, individual movement of the individual lengths 18 into or out of the hub assembly (12).
