Abstract (en)  
1. An integrally moulded clip connector comprising a moulded case (4) provided with securing clips (41) and release wings (42), a plurality of conductors (2) one of which is connected to a resilient and conducting grounding strip (5), and the others are connected to resilient and conducting elements (1) nipping with a given pressure stripped electric conductors of dimension d housed in electricity distribution ducts, said resilient and conducting elements (1) having the form of a U whose legs are spaced apart by a value e less than d, connector in which said resilient and conducting elements (1) each consist of a U-shaped element with jointing legs whose legs were spaced apart by a value e during moulding of the case.

Abstract (fr)  
Connecteur à pince pour canalisation de distribution électrique, comprenant un boîtier sourmoulé (4) muni de pinces d'accrochage (41) et d'ailes de décrochage (42), une pluralité de conducteurs (2) dont l'un est relié à une lame élastique et conductrice (5) de mise à la terre, et les autres sont reliés à des éléments élastiques et conducteurs (1) en forme de U, pinçant avec une pression de contact donnée des conducteurs électriques dénudés, logés dans ladite canalisation.
