Abstract (en)

[origin: EP0077302A1] A method is described for shaping rapidly, safely, and without waste, <<multipak>> type plastics film-wrapped packages (1) of food products (3) which are individually wrapped. The method comprises the successive steps of taking the products (3) from a store (13) in which they are stacked, conveying them towards a continuously-shaped plastics film wrapper (14) one at a time, and with individual drive, and introducing them one at a time, and with individual drive, into the plastics film wrapper (14) in groups of a predetermined number.
