Abstract (en)
[origin: EP0077992A1] 1. Apparatus for performing spot check-like control weighing operations on filled packs, particularly packs of coffee (10, 10a), which are conveyed in a continuous row (11) on a conveyor (12), with devices for in each case removing one test pack (14) from the conveyed flow, for placing the same on a control balance (15) and for returning the test pack (14) to the conveyed flow after weighing, characterized by a slide (16) reciprocable at right angles to the conveying direction (arrow 18) of the row (11) of packs (10, 10a) having holding members (clamping jaws 25, 26), which can be applied to the facing lateral surfaces (23, 24) of the test pack (14) for securing the same and between which the packs (10, 10a) can be conveyed when the holding members (clamping jaws 25, 26) are not applied, as well as by a device (lateral guide 28 ; pressure jaw 31) for fixing the pack (10a) of the row (11) following the test pack (14) with the conveyor (12) running.
