Abstract (en)

A travelling trolley mainly comprising one or more track wheels (31), a load carrier (38) and a connecting body (34) between wheels (31) and carrier (38), wherein said connecting body is made from sheet material which is profiled by a pressing process into the desired shape, the lines of force caused by the load pass most advantageously to the wheels. The load carrier (38) is provided with at least one shaft (37) extending parallel to the wheel axles, along which shaft each connecting body (34) can be slid and fixed in position.
