Abstract (en)
This articulation device is composed of two male and female elements, each comprising a fastening part (1) and a male (8) or female (18) assembly part which are disconnectable and which are capable of being secured to one another in a plurality of easily interchangeable positions by means of slideway profiles which are blockable in the appropriate position by means of a screw (12). <IMAGE>

Abstract (fr)
Ce dispositif d'articulation est composé de deux éléments mâle et femelle comprenant chacun une partie de fixation (1) et une partie d'assemblage mâle (8) ou femelle (18) dissociables et susceptibles d'être assujetties l'une à l'autre dans plusieurs positions facilement interchangeables, au moyen de profils en glissière pouvant être bloqués en position adéquate par une vis (12).
