Abstract (en)

A system of a shower tray with waste and support means is disclosed, the system comprising: a shower tray (10) provided with a flat (12) having a waste hole surrounded by a spigot (13) dependent from the flat (12); support means (50, 60) capable of supporting the shower tray (10), the support means (50, 60) having a channel (54) for accommodating waste components (20, 30) below the shower tray (10); a waste flange (1) which has a flange portion (2) capable of resting on the flat (12) of the shower tray (10) and which has a tail portion (4) capable of passing through the spigot (13); and a waste body adaptor (20) having (a) means (24) for resisting rotation relative to the support means (50), (b) a recess (21) for accommodating a lower end region of the spigot (13), (c) a threaded portion (22) for engagement with a complementary threaded portion (5) on the tail portion (4) of the waste flange (1), and (d) a portion (23) suitable, in use, for engagement with a waste trap (30). The body adaptor (20) per se constitutes another aspect of the invention.
