Abstract (en)

[origin: EP0078968A2] 1. Closure for mailing containers, envelopes or the like consisting of paper plastics-coated on one side, with a closure flap foldable about a main fold line on the rear wall of the container and having an additional fold line parallel to the upper edge of the flap, which defines an inwardly-foldable end strip on the upper edge of the flap, and adhesive strips, characterised in that the end strip (6) is made in two layers, the parts (6a) and (6b) of the strip having their coated surfaces together, and that a single adhesive strip (8) is arranged to cooperate partly with at least a portion of the uncoated surface of the inner strip part (6a) and other wise with the inner surface (9) of the flap (3) coated up to the additional fold line (7).
