Abstract (en)

1. Controlled-foaming detergent composition, based on an anionic detergent or a combination of an anionic detergent and a nonionic detergent, having a mono- and/or dialkyl orthophosphate content, of which the alkyl group has 12-22 carbon atoms or of which the alkyl group is separated from the P-atom by up to 6 alkylene oxide groups, characterized in that it further has a metal soap content originating from di- or trivalent metal cations.

Abstract (de)

Die vorliegende Erfindung betrifft ein schaumkontrolliertes Waschmittel und ein Verfahren zu dessen Herstellung. Die Schaumkontrollierung wird dadurch erreicht, dass einem, ein Alkylphosphat enthaltenden und anionogene oder anionogene und nichtionogene Tenside aufweisenden Waschmittel Metallseifen mit zwei- oder dreiwertigen Kationen zugesetzt werden.
