Abstract (en)  
[origin: EP0065924A1] Clonable fragment originating from the genome of a poliovirus. It is comprised of a segment hybridable to a portion of the poliovirus of the PV-1 type, said segment coding for the capsid proteins and for possible proteases necessary for the splitting thereof, nevertheless essentially to the exclusion of a fragment hybridable with the terminal portion of the poliovirus, comprising at least 1.7 to 1.8 kilobases from its terminal end (3') and coding for the proteins intervening in the replication of the poliovirus.

Abstract (fr)  
Fragment clonable originaire du genome d'un poliovirus. Il est forme d'un segment hybridable a partie du poliovirus du type PV-1, ce segment codant pour les proteines de capsid et pour les eventuelles proteases necessaires au decoupage de celles-ci, cependant essentiellement a l'exclusion d'un fragment hybridable avec la partie terminale du poliovirus, comportant au moins 1,7 a 1,8 kilobases a partir de son extremite terminale (3') et codant pour les proteines intervenant dans la replication du poliovirus.
