Abstract (en)
[origin: WO8204256A1] These compositions contain the reaction product of a liquid cycloaliphatic epoxy resin having more than one 1,2-epoxy group per molecule with a diphenolic compound. This reaction product, which is solid, may be employed with curing agent, filler and the like in any conventional manner or, as preferred, as molding compound.

Abstract (fr)
Des compositions ameliorees thermodurcissables contiennent le produit de reaction d'une resine epoxyde cyclo-aliphatique liquide ayant plus d'un groupe 1, 2-epoxy par molecule avec un compose diphenolique. Ce produit de reaction, qui est solide, peut etre utilise avec un agent de polymerisation, un agent de remplissage et autre d'une maniere conventionnelle ou, d'une maniere preferee, en tant que compose de moulage.
