Abstract (en)

[origin: EP0080519A1] 1. Folding machine for folding posters having a rolling-up device (1) with a plurality of driveable rollers (3) and a drawing-off device (20), which in each case draws off one poster roll (29) in the inner space surrounded by rollers (3) and supplies same to a folding mechanism (40), characterized in that over the entire working width of the folding machine, rollers (3) surround a rigid tube (2) with a limited spacing, one end (15) of tube (2) is firmly anchored to the folding machine and is constructed in self-supporting manner at its other end (18), and that at the self-supporting end (18) is arranged the drawing-off device (20), which axially draws off the poster roll (29) from tube (2).
