Abstract (en)

Mouth-piece for grit-blasting device with suction-remove, which mouth-piece comprises a member 6 preferably annular of cylindrical, that for example can be attached to or with the help of clamping means fixed onto the inlet 2 of a suction channel 3 of a grit-blasting device; that in this annular member around the inlet, is placed a wreath 11 of serried hair or one or more brushes. That inside the wreath of hair a deformable member 14 like a cylindrical bellows with one or more constrictions has been placed.
