Abstract (en)
[origin: US4464063A] The watch case contains a crystal (1) and a casing (3), on an upper peripheral surface (2) of which the crystal (1) is detachably mounted by means of connecting members or straps (10). These connecting members may consist of a U-shaped clamps (10) having arms (11, 12) to which the edges of the crystal (1) and the casing (3) are tightened and which are capable of being set in place by being laterally engaged on the edges of the case.
