Abstract (en)

In a road a cover (2) is provided above a gutter or a well, said cover (2) bearing on cover supports (4). In order to avoid rattling of the cover (2), the cover (2) engages by a wedge effect with the cover supports (4), however with such a small wedge surface that same will deform through the load of vehicular traffic until the cover (2) is bearing on sufficiently large bearing surfaces (7) (8).
