Abstract (en)

[origin: EP0081464A1] 1. A process for the manufacture of a metal bracelet consisting of links connected together and comprising a frame made up of elements (1) connected together, and ornamental pieces (6, 7) each welded to one of these elements (1) so as to cover the two main faces of this frame, characterised in that the ornamental pieces (6, 7) are welded to the interconnected elements (1) of the frame by spot welding using the discharge from an electrical capacitor between electrodes which are applied to the polished, finished surface of the conspicuous main faces of the two ornamental elements (6, 7) of each frame element (1).
