Abstract (en)  
[origin: EP0081476A1] 1. A squeegee device for the application of liquid, paste, powder or foam substances on to a product web with or without the use of stencils, the squeegee device being arranged to swivel opposite the support for the product web and the squeegee being capable of being pressed against the support, characterised in that the mounting (8, 8', 8") of the squeegee (9, 9', 9") is provided with contrivances (12", 12"', 13, 13', 13", 14, 14', 27) whereby adjustable forces are exerted on the mounting which oppose the forces acting on the squeegee in the operating state.
