Abstract (en)

[origin: WO8204473A1] The coating is subdivided radially into at least two layers (11, 12, 13) and axially into at least two portions. A gas-tight sheet (14) is arranged between the portions of the coating and comprises radially at least three sections (16, 17, 18) which are interconnected so that the internal section can be withdrawn along an axial direction.
