Abstract (en)
[origin: EP0081659A1] 1. Electromotor-driven pumping unit consisting of a vane-cell pump having a housing and with two medium channels for supplying and removing the pressure medium, the housing of the vane-cell pump being fastened to the housing of an electric motor by means of an adapter part and one medium channel opening into the interior of the adapter part, characterized in that the closed-off interior (19) of the adaptor (15) is connected via at least one through-orifice (24) to the interior of the housing of the electric motor (2).
