Abstract (en)

[origin: ES8308988A1] A traveling grate for a furnace. The grate is formed of plural pipes through which flows a cooling medium, in particular water. The grate also includes plural movable chains. Grate plate guide flanges are arranged laterally on the pipes. The guide plates, which are connected to the chain rest on the guide flanges. The upper strand of each movable chain is guided in an additional chain guide. The lower strand serves to move ash which has fallen through the grate away to a collection station. Due to the heat discharge through the pipes, the heating performance of the grate can be increased or at a given heating performance an elevated life span can be achieved. Fluid which can be heated up in the pipes can be used profitably, for example to preheat boiler heat.

Abstract (de)

Der Rost (3) besteht aus von einem Kühlmedium durchflossenen Rohren (14) und umlaufenden endlosen Ketten (4), an denen Rostplatten (20) angebracht sind. Seitlich an den Rohren sind Rostplatten-Führungsleisten (15, 16) angeordnet, auf denen die mit der Kette (4) verbundenen Rostplatten (20) aufliegen. Das obere Trum (4a) jeder umlaufenden Kette (4) ist in einer zusätzlichen Kettenführung (22) geführt. Das untere Trum (4b) dient zum Abfordern von Asche (24), die durch den Rost hindurchgefallen ist.
