Abstract (en)
[origin: EP0081803A1] 1. A multipack produced from a one-piece blank made of board or a similar material, containing at least four conical containers (23) arranged in two rows, with a top panel (1) resting on the containers and a bottom panel (13) connected to the top panel via side and end panels (9, 11, 3, 6), wherein the top panel (1) is larger than the bottom panel (13), which has tabs (20) formed by cut lines (22) and crease lines (21), wherein each of the end panels (3, 6) consists of two sections (30, 31; 60, 61), which are connected by a folding line (4, 7) that extends horizontally when the multipack is erected, one of these folding lines (4) being located the same distance from the middle of the top panel (1) as the other folding line (7) is from the middle of the base panel (13) and wherein the width of the end panels (3, 6) and the side panels (9, 11) is slightly larger than the average diameter of one of the containers that are packed in the multipack.
