Abstract (en)

[origin: WO8300036A1] Arrangement for launching a rescue vessel from an offshore platform or a vessel. A launching of the rescue vessel as far as possible from the carrying structure and with the bow turned away from this is desirable. It has a first, inner boom (11) carried pivotable around an axis (14) positioned substantially horizontally and perpendicularly to the length axis of the inner boom (11), and an outer boom (12) pivotably carried by the inner boom (11), with a pivoting axis (21) being substantially perpendicular to both booms length axis. The carrying wires (24, 25) are suspended from the outer boom.
