Abstract (en)
[origin: EP0082778A2] 1. Can or similar container comprising a pouring neck (1) which may be closed off by a stopper secured to said neck and which is provided on the inside with a permanently fixed destruction device (4) for the destruction of a closing member (7) secured in tight manner on the end of the neck (5) of the bottle (6), said device (4) comprising at least an opening (8) to allow the flow of the liquid contained in the bottle (6), a guiding bore (9) for the neck (5) of the bottle (6) and a cutting member (13) provided at the level of the opening (8), characterized in that the destruction device (4) comprises, on the one hand, a cylindrical wall (10) of which the inner face (12) defines the guiding bore (9), and on the other hand, at its upper end, an annular stop member (20) adapted to receive in resting contact a truncated widened part (30) of a bottle (6), the inner face (21) of said stop member being likewise truncated and being connected, by its lower edge, to the inner face of said cylindrical wall (10), and in that the cutting member (13) is provided at the lower end of said cylindrical wall (10) and projects towards the axis (14) of the guiding bore (19).
