Abstract (en)
[origin: WO8300304A1] Tool holder for hanging up tools on a board, rail, wall, or the like having a substantially vertical surface. The tool holder comprises an element which is integrally made of wire or strip material and which as a V-shaped portion (11) between two mutually spaced limbs (10) to be connected to the surface at one end thereof projecting from the surface. Said V-shaped portion converges from the limbs at the other ends thereof and includes an acute angle with the limbs in order to bear against the surface at the apex (12) of the portion in the intended mounted position of the element with the V-shaped portion extending downwards.
