Abstract (en)

[origin: US4493119A] The device for the treatment of the eyes with a washing or bathing liquid consists of a container, which possesses a cover, in which are located two vertical whirlpool tubes as washing devices, spaced to accommodate the two eyes, in the interior cross section of which is located a whirlpool device to generate bubbles as in the manner of a whirlpool bath. The cover carries the whirlpool tubes with intake. Only the washing liquid is located in the container.
