Abstract (en)

A portal (1) for removing and laying railway tracks (3), particularly points, allows the period of interruption of the railway and the work force used to be drastically reduced. The portal (1) has a crossbeam (4) with ends slidable vertically along respective pillars (5). Each of the pillars (5) is provided with tracks (8). The crossbeam (4) includes a central section (12) and end sections (13) which can be individually extended from the central section (12). The central section (12) is mounted on a railway bogie (16) with the interpositioning of a turntable (17), the bogie (16) having withdrawable, retractable wheels (18).
