Abstract (en)
[origin: EP0084363A1] 1. Headphone ear cushion comprising a cushion shaped or moulded member (1) which consists of plastic and which annularly surrounds a headphone housing, bears on the latter and comprises a U-shaped cross-section open towards the side remote from the head, the shaped member consisting of a thick-walled material and having a connecting region (5) of lesser thickness bearing on the head, characterized in that both ends of the shaped member (1) have an angled form and continuously bear in spaced-apart relationship on the side facing the ear of a plastic ring (7) connected to the headphone housing (9), and that the shaped member consists of a material with high elastic elongation and is made semicircular in such a manner that with increasing application pressure the application area on the head increases.
