Abstract (en)

1. Package for packaging two beds objects, this package comprising partitioning defining, inside said package, housings for each of said objects, two parallel parts (5) of said partition forming inserts between contiguous objects being joined together by a perpendicular panel to which they are hingedly fixed by a folding line, the panel (4) being fixed to a wall (2) of said package, this package being characterized in that said panel (4) is counterbonded against the internal face of the wall (2) of said package, in that it has weakened zones following said fold lines and in that said wall comprises two break lines (3) parallel to said fold lines.

Abstract (fr)

Dans cet emballage, le panneau 4 du croisillon est contrecollé contre la face interne de la paroi correspondante du corps d'emballage 1. Un panneau 2a, de dimensions analogues à celles du panneau 4 est limité sur cette paroi par des amorces de rupture 3. En l'arrachant, on arrache simultanément le panneau 4 et l'on a ainsi accès aux objets conditionnés, des bouteilles par exemple.
