Abstract (en)

[origin: EP0084518A1] 1. A piece of furniture which is lockable by means of a door, with built-in holding means for a refuse bag, a container (17) which is open at the top with an inner hollow space which is dimensioned to receive a refuse bag (70), being arranged with rollers on the floor on a pair of extension tracks (20) projecting perpendicularly to the door opening in the furniture so as to be horizontally displaceable, characterised in that the plane containing the edges of the opening (18) of the container (17) forms an angle with the floor plane (19) of the container (17), that in addition a cover (30) to cover the opening (18) of the container (17) is suspended on a holding rod (32) secured horizontally in the furniture, and that, on the one hand on the container (17) and on the other hand on the door (15), an abutting hook (40) which is secured so as to rotate in a vertical plane is provided with means (46-48) for securing the lowest rotational position or a locally rigid catch hook (50) is provided with means for forming an abutting surface and for hooking the abutting hook (40).
