Abstract (en)  
[origin: EP0084619A1] 1. Additional glazing for windows, with a frame (32) which borders an additional glass pane (30) and the legs of which each comprise an attachment batten (36), firmly attached to the casement (18) of the window, and a profile batten (38) bordering the edge of the glass pane (30), the said battens being lockable with one another and being connected to one another in a hinge-like manner along one leg of the frame by means of a strip (66) of flexible material, characterised in that the strip (66) is provided on all the legs of the frame (32) and in each case connects the attachment batten (36) to a clamping batten (52) which can be clamped to the profile strip (38).
