Abstract (en)  
[origin: EP0084660A2] 1. Vending counter (14) with an evaporation section that is upwardly delimited with respect to the cooled goods display section by a goods display base (12) that can be lifted up and is downwardly delimited by an insulation base (2), wherein at least one evaporator (1) is provided in the evaporation section that can be raised by lifting means and immovably installed in the raised position, characterised in that the evaporator (1) is independent of the goods display base (12), whereby the lifting means on the one hand engage the evaporator (1) and on the other hand are indirectly or directly supported on the insulation base (2), and the lifting means consist of at least two pairs of guide rods (3, 7) that hold the evaporator (1) in the raised position at a distance from the insulation base (2) and in the deflected position lay the evaporator (1) flat on the insulation base (2).
