Abstract (en)  
1. Paper coating composition consisting of A) water B) a binder in the form of latex particles, consisting of a copolymer of alkyl esters of acrylic or methacrylic acid, an unsaturated carboxylic acid and other monomers which have an ethylene bond and at least one polar group, C) conventional fillers or pigments D) a dispersing agent E) and optionally other conventional additives characterised in that the binder B is made up of an emulsion polymer of 1) 45-94,5 % by weight of alkyl esters of acrylic and/or methacrylic acid, optionally in admixture with styrene 2) 3-20 % by weight of hydroxyalkyl ester of acrylic or methacrylic acid 3) 2-10 % by weight of acrylamide and/or methacrylamide 4) 0.5-5 % by weight of an unsaturated polymerisable carboxylic acid 5) an optionally up to 20 % by weight, based on the weight of the copolymer, of other monoolefinically unsaturated monomers and in that the aqueous dispersion of the emulsion polymer has a minimum film forming temperature of not higher than 50°C.

Abstract (de)  
Eine Papierstreichmasse, bestehend aus Wasser, üblichen Füllstoffen und gegebenenfalls sonstigen Zusätzen, einem Dispergiermittel und einem vorzugsweise als Alleinbindemittel eingesetzten Latex eines Emulsionspolymerisats aus Alkylestern der Acryl- oder/und Methacrylsäure, gegebenenfalls im Gemisch mit Styrol, einem Hydroxyalkylester und einem Amid der Acryl- und/oder Methacrylsäure, sowie einer ungesättigten Carbonsäure, ergibt - insbesondere auf Offsetpapieren - Striche von hoher Naßrupffestigkeit und hohem Wasseraufnahmevermögen.
