Abstract (en)  
A mat, provided along its circumference with a coupling member with another similar mat, wherein the coupling member is an L-shaped flange (1) at the edge of the mat, wherein the thickness of the vertical leg (3) increases in the direction of the free end and together with the side edge (4) of the mat it defines a groove (5), the width of which increases in the direction of the bottom in such a way that the largest thickness of the leg (3) is larger than the smallest width of the groove (5) and wherein at least the vertical leg (3) of the L-shaped flange (1) is made of resilient, compressible material.
