Abstract (en)
[origin: EP0085329A2] 1. Connection device for outlet fittings in an installation for conveying water for industrial or domestic use, in flexible pipe lines (15) which are laid in dummy pipes (17) in a building, having a connection piece (12) secured under the wall surface in a connection box (3), which connection piece has at least one pipe line connection (16) and a connection (14) for the outlet fitting arranged in an aperture of the connection box (3), characterized in that the connection box (3) has a lower part (4) and a cover (5), with the aperture (22) for the fitting connection (14), which can be placed on it, in that the connection piece (12) with the attached flexible pipe line (15) can be inserted from the front into lower part (4), can be secured, and covered by the cover (5), and the lower part (4) has a holding means (7) with a semi-circular recess (11) in which the connection piece (12), constructed as an angle piece, is centred and is secured by means of a clamping nut (13) (Fig. 1 to 3).
