Abstract (en)
The opening part (1) of the skylight consists of a single transparent piece comprising, around its main surface (4) substantially parallel to the roof, lateral edges (6, 7) and a lower edge (5), these edges pointing downwards in substantially vertical planes. The downward edges descend practically to the level of the horizontal part (3) of the skirt surrounding the vertical edges (2) of the same forming the frame of the skylight. The piece forming the opening part (1) may be curved between the lower downward-pointing edge (5) and the main surface (4) and between the lateral downward-pointing edges (6, 7) and the main surface (4). <IMAGE>

Abstract (fr)
L'ouvrant (1) de la lucarne est formé d'une seule pièce transparente comprenant, autour de sa face principale (4) sensiblement parallèle au toit, des bords latéraux (6, 7) et inférieur (5) rabattus dans des plans sensiblement verticaux. Les bords rabattus descendent pratiquement au niveau de la partie horizontale (3) de la costière entourant les bords verticaux (2) de celle-ci formant le dormant de la lucarne. La pièce constituant l'ouvrant (1) peut être galbée entre le bord rabattu inférieur (5) et la face principale (4) et entre les bords rabattus latéraux (6, 7) et la face principale (4).
