Abstract (en)

In a continuous heat treating line for a cold rolled steel strip (S) or sheet comprising a heating zone, a soaking zone, a primary cooling zone, an overaging zone, a secondary cooling zone and a posttreating zone, the improvement wherein said primary cooling zone comprises at least a pair of vertical warm water dip cooling tanks (W, W min) each provided with an immersed deflector roll (22, 22a), the first of said tanks (W) being provided with means for controlling the length of a dipped strip portion, while the second of said tanks (W min) is provided with means for controlling the temperature of warm water in said second tank and at least a pair of means (23) for producing jets of warm water.
