Abstract (en)
[origin: EP0086692A1] 1. Ignition distributor support shaft, particularly for magnetically controlled ignition of a motor vehicle, comprising a sleeve (2) driven in rotation by the shaft (1) of the distributor, the said sleeve (2) being provided with a shoulder (7), on which bears a pole disc (3), a plate (5) coaxial relative to the pole disc (3) and connected to the centrifugal advance correction device (6) fixed to the shaft (1) being likewise carried by the sleeve (2), the pole disc (3) and the plate (5) being spaced from one another, characterized in that the spacing between the pole disc (3) and the plate (5) is obtained by means of a spacer (4a, 4b) having fingers (17) and/or (8a, 8b) orienting the pole disc (3) relative to the plate (5), the assembly formed by the pole disc (3), spacer (4a, 4b) and plate (5) being fixed to the sleeve (2) by a means of assembly carried out in a single operation.
