Abstract (en)

[origin: US4531797A] On at least one of two walls (16) (17) a terminal (7) housing (21) has a rib (44) respectively (45) that causes lateral distortion of a tubular housing (38) (39) which is part of a cover (3) so that the head (11) of a bolt of the terminal is gripped. This device, which is extremely simple to assemble, is recommended to make the terminal bolts so they cannot be lost and to hold them in an open position prior to wiring.

Abstract (fr)

Un logement (21) de borne (7) présente sur au moins une de deux parois (16) (17) une nervure (44) respectivement (45) qui provoque la déformation latérale d'un logement tubulaire (38) (39) appartenant à un capot (3) de façon à pincer la tête (11) d'une vis de la borne. Ce dispositif qui présente une grande facilité d'assemblage est recommandé pour rendre les vis de borne imperdables et pour maintenir celles-ci en position ouverte avant câblage.
