Abstract (en)

[origin: US4473017A] An apparatus for use with a sewing machine to automatically hem the free ends of tubular portions of garments. The apparatus has a guide cylinder with a stop and a tension cylinder capable of being retracted, both of which are mounted on the sewing machine with a folding guide which is moveable between a retracted position and an operative position. A tube connected to a source of compressed air assists in removing the sewn garment from the apparatus.
